**M13 Rechargeable 6050 Flashlight**

The 6050 Flashlight is a heavy duty industrial/professional quality spotlight. The Xenon lamp module produces a powerful bright white light. The body is made of unbreakable ABS and includes a polycarbonate lens and thermoplastic rubber shroud that resists chemicals and corrosion. Included are two reflectors, a modified spot (stippled for a wide beam) and a laser spot (smooth for a tight collimated beam). The dual filament Xenon back-up safety lamp provides an additional 30 hours of lamp life and is stored behind the lens for emergencies. The shock absorbing internal battery module protects the batteries and the lamp module from hard knocks and dropping. The pistol grip/lantern handle converts to multiple positions for flexibility and a fold away stand allows you to angle the beam in multiple directions.

Options include direct wiring, 12V adapters, 110V transformers and more. The rechargeable battery pack charges in 10-12 hours, preparing the LaserPro Rechargeable for a full day's work. An LED indicator illuminates when the LaserPro is charged. Mount the LaserPro in vehicles using the 12V adapter or direct wiring kit. The durable rechargeable battery pack can take a charge over 500 times.

Minimum Pack 1 ea.  
 Packaged Weight: 4.7 lbs.
